

ACE

Our Adaptive Configuration Efficiency (ACE) Rules Engine is an integral pillar of our technology, adding flexibility to the Enterprise Lending Center product suite. This powerful and flexible engine gives lenders the ability to close more loans with increased agility by providing configurable workflow options extending throughout our application suite including the presentation, business and database layers.

FUNCTIONALITY OF THE ACE RULES ENGINE INCLUDES:

- Loan officer compensation calculations
- Loan Estimate/Redisclosure monitoring
- Qualified Mortgage/Ability-to-Repay validation and decisioning
- Automated status and task management
- Continuous product validation
- Business policy enforcement
- Automated pricing changes
- Risk mitigation actions (including high cost tests)
- Service requests to external systems
- Auto-resolution
- MERS registration
- Auto-distribution and notification
- Operational efficiency

The ACE Rules Engine utilizes user-friendly wizard-based tools to provide granular control over workflow, automation and enforcement of compliance and business policies. Improving efficiency across all departments, these automated actions flow throughout the Enterprise Lending Center, Document Center and Imaging Center. Rules extend to areas such as product and pricing, decisioning, fees, workflow, document management/distribution, messaging, security and more.

ENTERPRISE LENDING CENTER ACE RULES ENGINE:
